Schools

- Elementary, middle and high schools throughout Minnesota

PRC

Healthy Youth Development Prevention Research Center

For 30 years, the Centers for Disease Control and Prevention have worked to eliminate health disparities and create healthy communities by funding Prevention Research Centers (PRCs) throughout the United States.

The Healthy Youth Development • Prevention Research Center, housed at the University of Minnesota, Department of Pediatrics, is one in a network of 26 academic centers whose main objective – as a PRC – is to link science to practice through collaborations with public health agencies and community-based organizations.
